Student Dies After Savannah State University Shooting

(NY Times) Officials are investigating the death of a student killed in a shooting Thursday night at Savannah State University in Georgia, the university said in a statement. Loretta Heyward, a spokeswoman for the university, said in a statement on Friday that no arrests had been made in connection with the shooting that killed Christopher Starks, a junior from the Atlanta area. The Georgia Bureau of Investigation is handling the inquiry, with the help of the campus police, Ms. Heyward said. Mr. Starks is the only person known to have been taken to a hospital from the scene of the shooting. Ms. Heyward said the administration knew few details about the episode, and she urged anyone with information to come forward. "While it may be natural to want to protect an associate," she said in the statement, "the lack of disclosure may do more harm than good in the long run." On Thursday, The Tiger's Roar, a student newspaper at the university, reported that blood had been found on the floor of the student union building, near where the shooting took place. The campus was placed on lockdown after the shooting, but the measure was lifted shortly before midnight. The Tiger's Roar said that despite the end of the lockdown, students were being encouraged to stay in their dorm rooms. The shooting took place one day after two television news journalists were shot and killed while broadcasting live in Roanoke, Va., reigniting the long-running debate in the United States on gun control.

International News – Significant Events

Hundreds die as desperate migrants head for Europe

(Reuters) Libya on Friday recovered the bodies of 82 migrants washed ashore after their overcrowded boat sank on its way to Europe while Austria said 71 refugees including a baby girl had been found dead in the back of an abandoned freezer truck. Three people were arrested in Hungary in connection with the truck deaths and Austrian police said they suspected a Bulgarian-Hungarian trafficking ring was responsible. The victims - 59 men, 8 women and four children, including a girl estimated at 1-2 years old - were probably from Syria, police said. At least 180 were either dead or missing in the Libyan disaster. Both tragedies were a result of a renewed surge in migrants seeking refuge from war and poverty that has confronted Europe with its worst refugee crisis since World War Two. The U.N. refugee agency said the number of refugees and migrants crossing the Mediterranean to reach Europe had passed 300,000 this year, up from 219,000 in the whole of 2014. More than 2,500 have died making the crossing this year, the UNHCR said, compared with 3,500 who died or went missing in the Mediterranean in 2014. A security official in the western Libyan town of Zuwara, from where the doomed migrant boat had set off, said there had been around 400 people on board. Many appeared to have been trapped in the hold when it capsized on Thursday. "About 100 people are still missing," said Ibrahim al-Attoushi, a Red Crescent official, and about 198 had been rescued. The migrants were from sub-Saharan Africa, Pakistan, Syria, Morocco and Bangladesh, the security official said.

SITUATION SUMMARY

Hurricane Ignacio Twelve - E

Location: About 890 mi, East Southeast of Hilo, Hawaii

About 1100 mi East Southeast of Honolulu, Hawaii

Maximum sustained winds...90 mph

Discussion: IGNACIO continues to resist intensification. Statistical Hurricane Intensity Prediction Scheme (SHIPS) guidance continues to show slow intensification to about 95 knots at 48 hours followed by a weakening trend afterwards as this system moves across slightly cooler water and encounters more significant shear. While future forecasts may change, this forecast depicts the center of IGNACIO passing quite close to, but just northeast of the main Hawaiian Islands as a hurricane early next week.

- Watches/Warnings: No coastal watches or warnings in effect.
- Federal Response: The FEMA Region IX Regional Watch Center will activate to Enhanced Watch at 0800 hours on 8/28/15 and has requested Hurricane Liaison Team support for 8/29/15. The Regional Response Coordination Center will activate to Level II with select Emergency Support Functions, DoD and USCG on 8/31/15. Incident Management Assistance Team 3 will deploy to Honolulu, HI on 8/31/15. The Hawaii Emergency Operations Center is not activated.

Wet Weather This Weekend

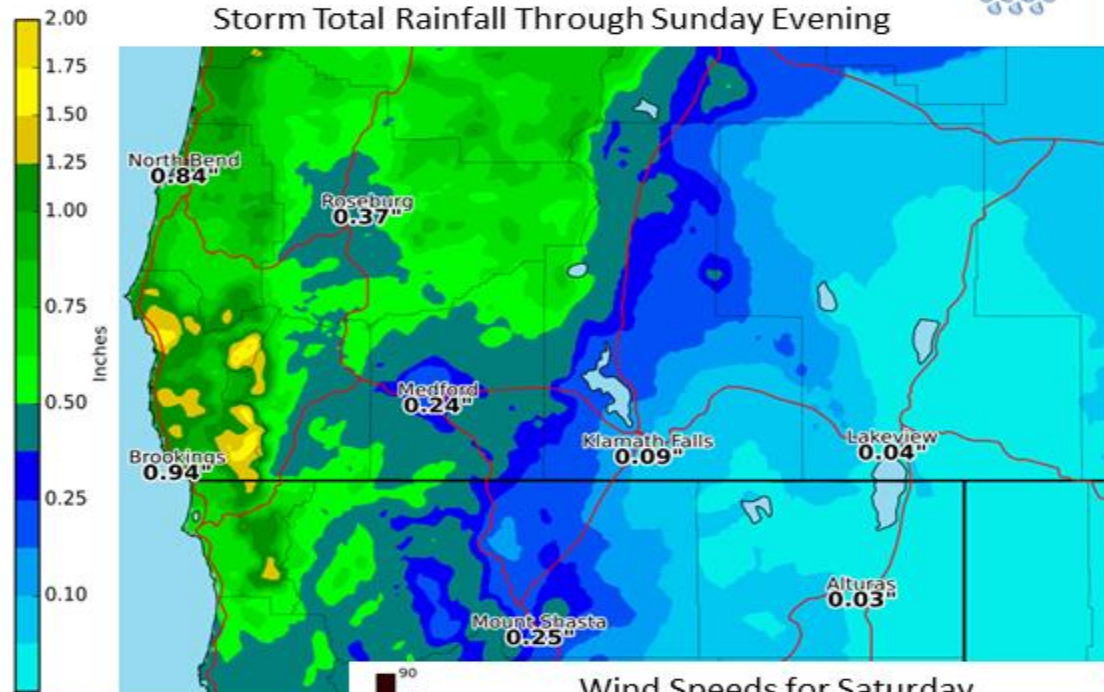

What's expected?

- Series of fronts to bring rainfall, cooler temperatures to much of southern Oregon and northern California.
- Rainfall expected to begin Friday morning at the coast and Friday night inland.
- Moderate to strong winds expected at the coast and on the East Side.

Possible Impacts

- Wet roads may become slippery.
- Flash flooding and debris flows possible on burn scars.
- Winds could down tree branches which could fall on power lines or across roads.
- Winds will make driving difficult for high profile vehicles for the East Side and near the coast.

SITUATION SUMMARY

Northern California Weather Event

A series of fronts will bring a dramatic change from the recent hot, dry weather from the past few weeks. The possibility of light spotty rain showers will start on Friday, however, the highest rain amounts will most likely hold off until late Friday night into early Saturday morning when a weakening front approaches the coast. A short break is expected on Monday before rain chances increase again on Tuesday. The heaviest rain will be across the coast and coastal ranges with the inland valleys seeing less rainfall. In addition, windy conditions are expected on the East Side as well as for the coast. Wind gusts of up to 50 mph will be possible, especially on Saturday. Cooler weather conditions with a chance of showers will persist on Sunday.

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:

High pressure will continue to bring dry weather conditions to northwest California through Thursday night. A front will approach on Friday and eventually bring some rain mainly north of Cape Mendocino by early Saturday morning.

Medford Weather:

A very unusually strong weather system will impact northern California beginning tonight. Small amounts of rain may be present, but temperatures will be cooler than normal next week.

Reno Weather:

Low pressure will move into the west coast this weekend. Winds become breezy this afternoon with windier conditions expected overnight into Saturday. A few showers will be possible mainly north of Interstate 80. More typical winds and seasonably cooler temperatures are expected from Sunday into next week.

San Francisco Weather:

Slight cooling is expected today as the upper ridge over California weakens. A pacific weather system will bring a chance of light rain to the northern Bay Area late tonight and Saturday morning. Much cooler weather will develop by the weekend. Dry and seasonably cool weather is expected next week.

WEATHER

WEATHER SYNOPSIS BY REGION:

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY:

Sacramento Weather:

Dry weather is predicted today with daytime highs just a bit lower than Thursday under increasing cloud cover. Cooler temperatures will begin over the weekend with a chance of showers over the northern portion of the state Saturday. Dry with a little below normal daytime high temperatures continuing through most of next week.

Hanford Weather:

Dry weather can be expected over interior central California for the next several days. Temperatures will remain several degrees above normal today as a ridge of high pressure lingers. By the weekend, temperatures will cool to slightly below average and locally breezy conditions are expected as a low pressure system impacts California.

SOUTHERN CALIFORNIA:

Los Angeles Weather:

High pressure along with weak offshore flow will bring above normal temperatures through Saturday. The high will weaken over the weekend and will bring a cooling trend along with an increase in coastal clouds.

Extreme Southwestern California including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

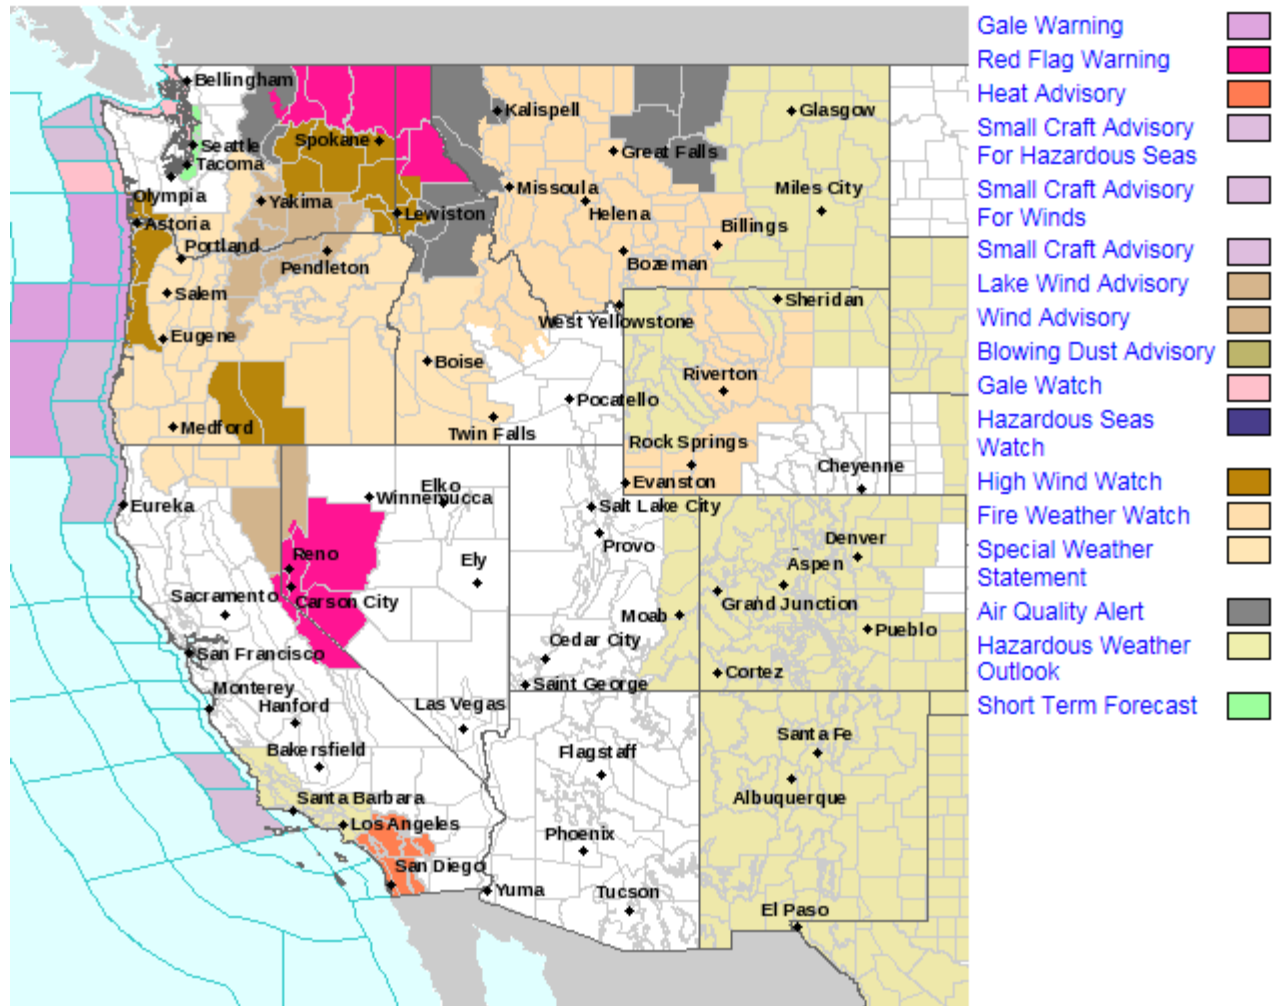

High pressure aloft will continue hot weather through Saturday. Residual monsoonal moisture is expected to bring some clouds to the mountains this afternoon and might be sufficient for an isolated thunderstorm or two, mainly in San Diego County. For Sunday through Thursday, a developing trough of low pressure near the west coast will bring a cooling trend and a return and deepening of the marine layer with stronger onshore flow.

Southeast California Weather:

Strong high pressure aloft will keep high temperatures well above seasonal normals through Saturday with hotter lower deserts reaching or exceeding 110. There will be sufficient moisture east of the lower Colorado River to support isolated to scattered afternoon and evening thunderstorms through Saturday.

Evacuations/Shelters:

- Mandatory Evacuation Areas:
 - The Hume Lake Christian Conference was evacuated 08/18/15. Per the Cal OES Law Duty Officer (LDO) evacuation was accomplished in less than 2 ½ hours due in significant part to prior planning between Fresno Sheriff and the Camp Staff. The group of 750 to 1000 people were evacuated to a sister Church in Fresno for sheltering.
 - There are 250 mandatory evacuations in the National Park Campgrounds in the immediate area of Hume Lake Christian Camp.
 - There has been an evacuation of 32 private residences, believed to be all vacation homes in the Big Meadow and Heart Meadow Neighborhood.
 - Approximately 1,500 campers in several Kings Canyon National Park Campgrounds located along 10 Mile Rd have been placed under mandatory evacuation.
- EOC Activations: Fresno County EOC is activated at Level 2 from 0730-1800.
- The California Highway Patrol has also moved the road closure, which had been located at the intersection of Highway 180 and Hume Lake Road. The new road closure now sits further south on Highway 180 at Grant Grove Tree (approximately 2 miles north of the Hwy. 180 and Hwy. 198 interchange). The roadway will remain closed until authorities determine it is safe to reopen. The Sheriff's Office wants to make the public aware that no one will be allowed to enter the Hume Lake area; people will only be allowed to exit.
- Per CUEA, PG&E critical facilities and distribution assets are no longer in a high risk category for threats to power serving Central California. CAISO has reviewed PG&E facility locations that may be impacted by the fire and none of the locations would compromise the grid in any capacity. There would be no brownouts if these sites were impacted.
